

## About

Hi, I am Nurettin "Onat" Unlu, a US citizen. I speak English and Turkish fluently and Arabic at an acceptable level. After many years of working as a network engineer, I have shifted to web development and I am now a full stack Web Developer. The stack that I am most comfortable with is React in the frontend and Go in the backend.

## Work History

- IBEC - Worked as a Network Engineer and personally got approved by US Department of Agriculture to work on a project funded by them to deliver internet to rural areas
- Earthlink - Network Voice technician
- Freelanced as a front-end developer with React (2 years)
- Currently working as a full-stack software engineer at [Dataplane](#) (1 year). I am responsible with all things frontend and setting up GraphQL endpoints, writing tests and more in the backend with Go.

## Education

- Gadsden State Community College: Associates Degree in Network Administration. GPA 3.86
- Self-thought: HTML, CSS, Javascript, React, MaterialUI, GO, GraphQL, PostgreSQL, MongoDB, NodeJS, Git, Typescript, Figma

## Achievements and Certifications

- GSCC Outstanding achievement award in Networking
- Completion of CISCO academy for CCNA certification with A grade
- Comptia A+, Net+, Security+ certifications
